DETAILED ACTION

Election/Restrictions

- 1. This application contains claims directed to the following patentably distinct species of the claimed invention:
- a. Claims 1-10 directed to a fuel cell comprising a pair of separators each including at least two plates, fuel and oxygen gas channel between the two plates, electrolyte electrode assemblies arranged along a virtual circle concentric with a central axis of the separators.
- b. Claims 11-12 directed to a fuel cell stack formed by stacking a plurality of fuel cells between two end plates, each fuel cell including a pair of disk-shaped separators and a plurality of disk-shaped electrolyte electrode assemblies along a virtual circle concentric with a central axis of the separators, end plates having holes for tightening bolts, and the holes and the electrolyte electrode assemblies being arranged alternately.
- c. Claims 13-17 directed to a fuel cell comprising a pair of separators each including a plurality of plates stacked together, fuel and oxygen gas channels between the two plates, electrolyte electrode assemblies between the separators, and at least one of the separator plates having protrusions for positioning the electrolyte electrode assemblies between the separators.
- d. Claims 18-20 directed to a fuel cell stack formed by stacking a plurality of fuel cells between end plates, disk-shaped separators and a plurality of circular disk-shaped electrolyte electrode assemblies disposed along a concentric circle, each separator having protrusions and

each end plates having holes for tightening bolts, the holes and the electrolyte electrode assemblies being arranged alternately.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 10/608,592 Page 4

Art Unit: 1745

Applicant is advised that the reply to this requirement to be complete must include an 2.

election of the invention to be examined even though the requirement may be traversed (37 CFR)

1.143).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Thomas H. Parsons whose telephone number is (571) 272-1290.

The examiner can normally be reached on M-F (7:00-4:30) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Pat Ryan can be reached on (571) 272-1292. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
